Seminar II

Seminar 2 will be implemented in the course of the engineering degree program which is the updated parts of the courses. Three courses are as follows:

Virtual Instrumentation, year 5, option Electronic Automation in the Department of Electrical and Energy Engineering. The seminar of this course will be implemented next academic year (October 2022 – February 2023) in which 10 hours of course and 6 hours of lab practice will be updated and accredited.

Power System Architecture and Protection, year 4, option Electrical Energy in the Department of Electrical and Energy Engineering. The seminar of this course will be implemented in this semester (February 2022 – June 2022) in which 6 hours of course and 10 hours of lab practice will be updated and accredited.

Automation, year 4, option Industrial Engineering in the Department of Industrial and Mechanical Engineering. The seminar of this course will be implemented in this semester (February 2022 – June 2022) in which 8 hours of course and 16 hours of lab practice will be updated and accredited.
