

Training in EU

Though the seminar content is good, the team were required to deliver both lecture and lab in the final accreditation. Therefore, the team went to train at P3-Grenoble University to study and practice the focus contents agreed by both sides during Mar – Apr 2022.

The studied contents were focused on the benchmark to be delivered from P3 to P5:

- Industry 4.0
- Cyber-physical system
- Wireless communication for industrial
- PLC
- PLC programming
- PLC communication and protocols
- HMI
- HMI programming
